**WINTER CONSTRUCTION AWARDED GEORGIA INSTITUTE OF TECHNOLOGY
FITTEEN, FREEMAN & MONTAG RESIDENCE HALLS' PROJECT**

Atlanta (December 14, 2009) - Winter Construction was recently awarded the Georgia Tech Fitten, Freeman & Montag Residence Halls' project. This is a phased project that will span over the next 24 months.

The Fitten, Freeman & Montag buildings will be completely renovated and elevator towers will be constructed to service the three buildings and improve accessibility. Similar to this project, in 2008, Winter successfully completed the Armstrong and Hefner Residence Halls' project.

Construction is expected to commence in April 2010.

Winter has enjoyed a 30 year relationship with Georgia Tech, beginning with our first project, The School of Industrial and Systems Engineering. Over the years, projects have included the Student Center Commons, Quad Cafe, Technology Plaza, Homer Rice Center, Daniel Lab and many others.

This will be Winter's 29th project for Georgia Tech.

About Winter Construction and Winter Environmental:

Founded in October 1978, Winter is a privately owned and operated Atlanta based general contracting company providing construction and environmental services to clients in the hospitality, retail, government, education, corporate/office, religious, healthcare, historic restoration, and multifamily markets throughout the Southeastern and Mid-Atlantic states.

Winter Construction has consistently been ranked in the Engineering News Record (ENR) Top 400 Contractors in the United States for more than 25 years. Winter Environmental has been continually recognized by ENR as one of the top 200 environmental firms in the United States.
