### **Bill Hill re-joins Winter Construction in business development**

**ATLANTA (March 18, 2011)** – Winter Construction recently expanded its team with the appointment of Bill Hill in business development for the company’s commercial business unit.

Hill rejoins Winter Construction after a 12-year absence, during which he most recently worked as a weatherization products category manager for ProBuild in Denver, Colorado, where he directed the company’s insulation and house wrap program for its 475 locations. Well versed in all aspects of building science and sustainable construction, Hill’s experience also includes co-creating and managing the national rollout of a new vapor permeable weather resistive barrier for Henry Company and launching new products for Fortifiber Building Products.

“Bill Hill brings the ideal background to this role at Winter Construction, combining diverse product development experience with more than 15 years in business development,” said Tom Nichols, Executive Vice President. “Throughout his career, Hill has played an important role in the growth of sustainable construction practices in commercial development, which will allow him to provide sound counsel to the many clients who turn to Winter Construction for such expertise.”

Hill is a native of North Carolina, where he attended University of North Carolina at Chapel Hill with a bachelor’s degree in industrial relations.

#### **About Winter:**

*Winter is a privately owned and operated Atlanta based construction management and general contracting company. Winter provides construction and environmental services to clients in the hospitality, retail, government, education, corporate/office, religious, healthcare, historic restoration, industrial and multifamily markets in the Southeast and Mid-Atlantic.*
